

HEXA-COVER®

HEXA-COVER®

The unique and patented Hexa-Cover® system to cover slurry, manure or water tanks.

Hexa-Cover® is ideal solution for eliminating:

- evaportation;
- organic growht;
- emissions and odour.

Hexa-Cover® is in use on almost all forms of basins. lagoons, reservoirs, containters, ponds and tanks and is used in several applications.

Easy installation:

Hexa-Cover® is delivered in big-bags and is easily poured onto the surface where it will distribute itself automatically and form a closed cover.

Easy handling:

- no supervsion;
- no operating costs;
- no repairs;
- no worries.

Easy access:

Whenever needed, access to the slurry is possible anywhere. The floating tiles can be simply pushed aside with the equipment e.g. a pump, a hose or a mixer.

When the equipment is removed, the tiles will reorganise and close the openings.

Floating Cover System

- self-acting distribution on the surface;
- self-acting adaption to changes in level;
- fits to all sizes;
- fits to all aeometries:
- no special equipment for installation;
- no repair cost;
- no maintenance cost;
- no supervision;
- no insurance cost:
- 25 years lifetime;
- a substantial value if sold secondhand.

Environmentally friendly:

Hexa-Cover® tiles are manufactured from recycled plastic with no use of Freon.
